Winner of Best of CES '11 People's Voice Award

The Razer design team has reinvented PC gaming on the go. The Razer Switchblade concept was designed to bring the full keyboard/mouse experience on the desktop on a handheld device. The dynamic keyboard and the ultra-sensitive multi touch screen are the key elements that give this portable gaming device the ability to play on the go without sacrificing precision and control. We've changed the game, and this is only the beginning.
